AFTER US

a game for social good

Anna Puteine
Krystyna Lopatych

WHAT'S NEW

Level 2 is playable

01. Progress carries over

Stations, buildings and cooked food move to level 2. Raw materials and compost reset.

02. New location: the shop

Clay, cardboard, seeds and a mushroom stump. A note from other survivors — the hero reacts to it.

03. Level goals

Build a garden bed, a mushroom farm and a clay fridge.

FOOD & SURVIVAL

Food spoils

Outside a fridge, food goes bad after one day. Spoiled food can still be eaten — with a penalty.

REAL TECHNOLOGY · THE ZEER POT

Clay fridge, no electricity

A pot inside a pot with wet sand between. Evaporating water cools the food.

The player shapes the pots, fires them on the campfire and waters the fridge every morning.

Waste becomes fertilizer

Spoiled food feeds the garden bed: potatoes grow 25% faster, once a day.

GROWING OUR OWN FOOD

Food from waste

Garden bed with greenhouse

- Seeds from the shop grow into potatoes
- Algae boost the harvest
- Boil potatoes on the campfire

Real practice: seaweed has long been used as fertilizer.

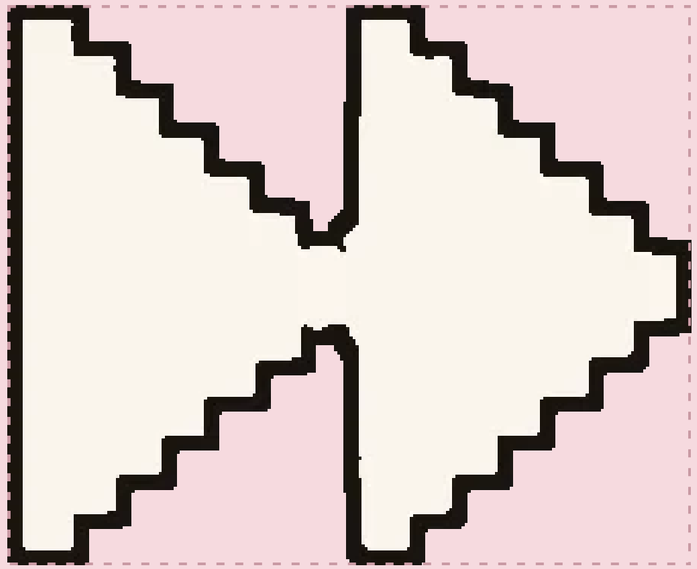

Mushroom farm

- Soak cardboard in the lake or at the workbench
- Lay it by the house, plant a wild mushroom
- One mushroom a day — fry it

Real practice: oyster mushrooms grow on wet cardboard.

QUALITY OF LIFE

Recipe book pages

Many new recipes, each with its own real fact.

Readable messages

Long hints wrap onto several lines. Hero lines no longer vanish behind open windows.

Time ×4

Speed up the day. The button switches off at night.

Nothing wasted

Leave a station without crafting and resources come back. The counter shows the cost.

PLANS FOR FUTURE:

Game mechanics and testing.

Ensure the gameplay is understandable.

Speed

Work on asset loading, game loading.

Storyline

Adding level 3 specific resources, locations and crafts.

Visuals

More images,text and button size optimization.

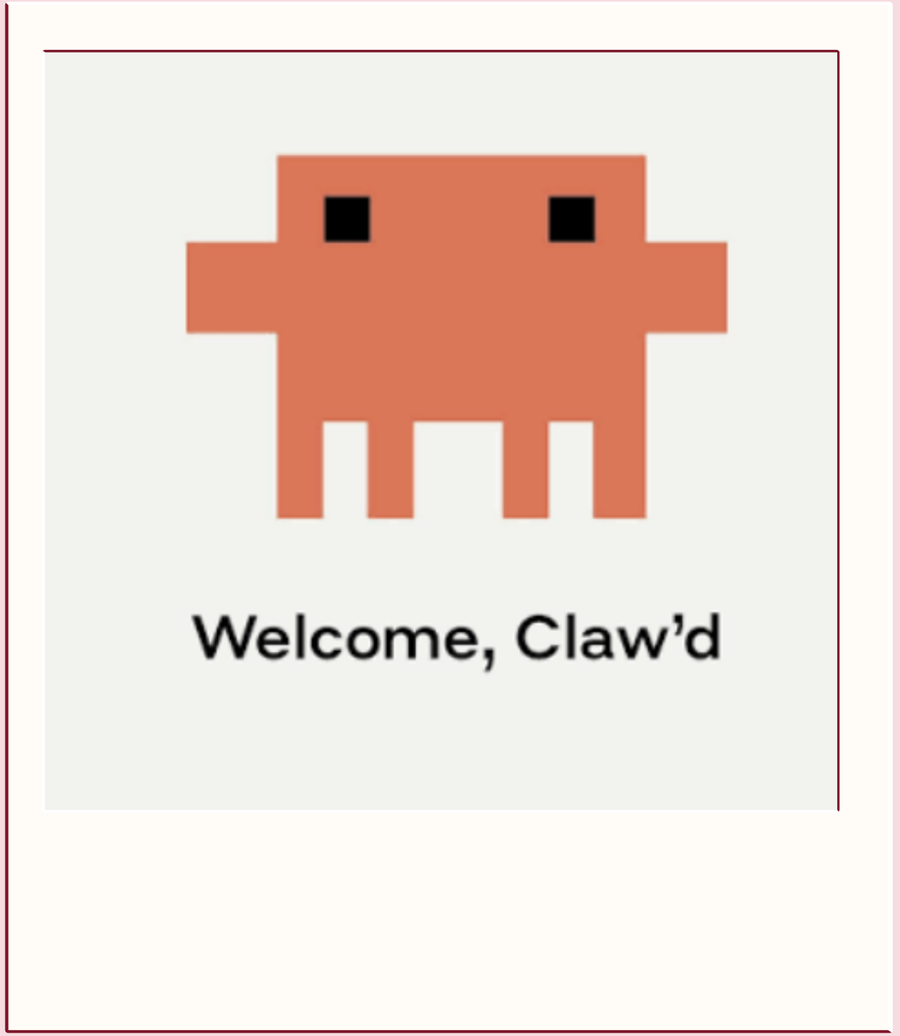

AI USAGE

- Chat GPT

For pixel art generation.

- Claude

For tests, architecture and structure check in code.

CONTRIBUTION

Anna:

- architecture guidelines
- tests, optimization, convertion
- storyline and design
- features: time speed, goals
- presentation

Krystyna:

- storyline and design
- image generation
- features: new resources, location, crafts, recipes

THANK YOU VERY MUCH!
