AFTER US

a game for social good

Anna Puteine
Krystyna Lopatych

Gameplay Experience

We asked 6 people (including adults - parents) to complete the first level and share their impressions:

70% of all respondents confirmed that some messages are not visible due to their size

90% confirmed that the game has a clear and understandable meaning

40% confirmed that there are enough hints, but it would be better if there were more

100% were able to name at least 2 real eco-tricks/facts from our game - the most popular are a water filter made from water, sand, coal, and fabric and a rocket stove

THANK YOU VERY MUCH!
