AFTER US

a game for social good

Anna Puteine
Krystyna Lopatych

GAME DESCRIPTION

Green ecology invention based survival game.

- player needs to find resources
- craft new items
- visit new locations
- learn about green inventions

IMPLEMENTED FEATURES

01. Picking up resources, choosing actions.

02. Crafting, using crafted items.

03. Locations, atmosphere state and recipes.

SOCIAL GOOD THEME

Each players action affects the environment: for example, throwing away plastic makes the living conditions worse.

Resources are limited, crafted eco inventions have informative notes.

PLANS FOR FUTURE:

Informative dialogs

Provide more information on each invention

Game mechanics and testing.

Ensure the gameplay is understandable.

Speed

Work on asset loading, game loading.

Storyline

Adding level 2 and level 3 specific resources, locations and crafts.

Visuals

More images,text and button size optimization.

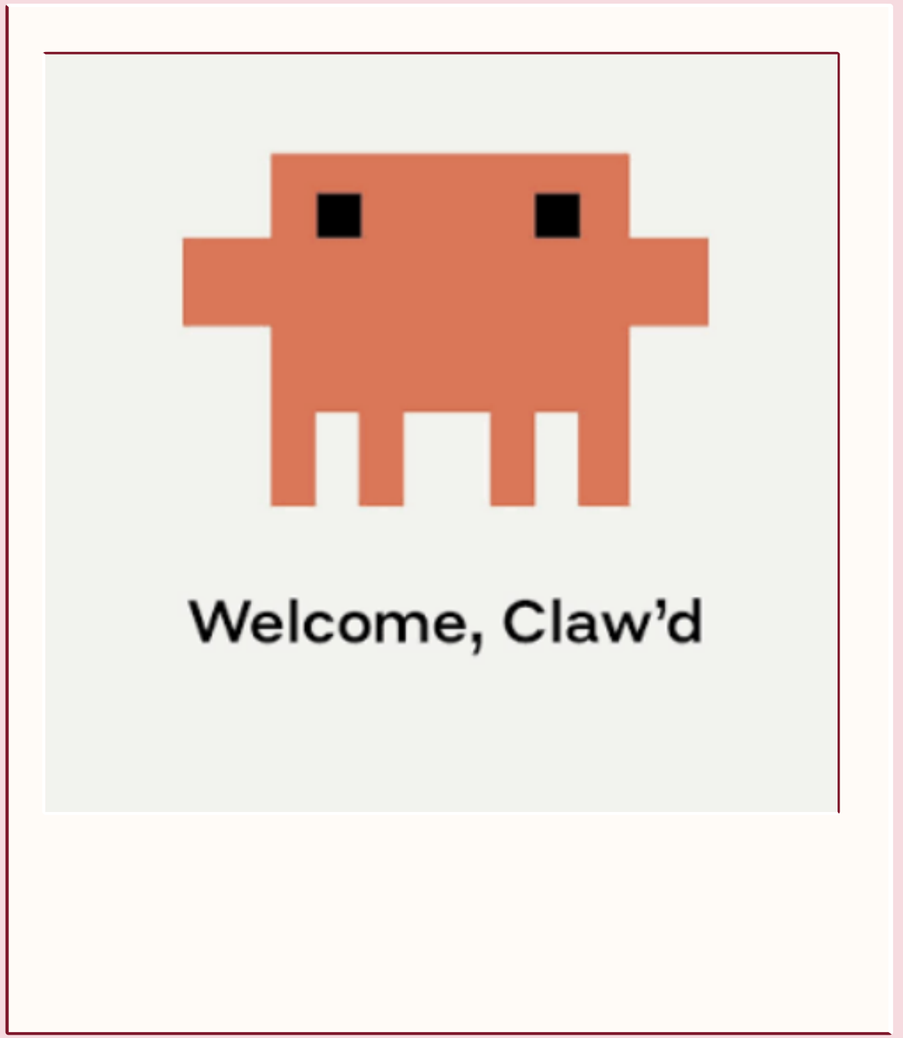

AI USAGE

- Chat GPT

For pixel art generation.

- Claude

For tests, architecture and structure check in code.
